Internal Cooking Temperatures	
135°F	Plant foods for hot holding
145°F for 15 seconds	Unpasteurized eggs
	Fish, except as listed below
	Meat, except as listed below
	Pork, except as listed below
155°F for 15 seconds	Commercially raised game animals, rabbits
	Ground or comminuted meats or fish
	Injected or mechanically tenderized meats
	Ratites (ostrich, rhea, emu)
165°F for 15 seconds	Pooled eggs when allowed
	Poultry
	Stuffed foods including: fish, meat, pasta, poultry
	Stuffing containing fish, meat, or poultry
WAC 246-215-03400(2)	Wild game animals
	Whole meat roasts; ham
Holding Temperatures	41°F or less; 135°F or greater

Cooling
Cool foods in shallow pans with a food depth of 2 inches or less, uncovered, refrigerated at 41°F, and protected from contamination.
OR
Cool foods from 135°F to 70°F within 2 hours
and
Cool foods to 41°F within a total of 6 hours or less.
Use the following cooling options:
• Rapid cooling equipment • Ice bath • Other methods that meet the time temperature criteria

PHF Potentially Hazardous Food
PIC Person in Charge
ROP Reduced Oxygen Packaging

Handwashing and Preventing Bare Hand Contact
Handwashing must take at least 20 seconds, and include a 10-15 second scrub, a thorough rinse, and a complete drying of the hands.
Bare hand contact with ready-to-eat foods is prohibited. Single-use gloves, tongs, utensils, or other approved methods must be used when handling ready-to-eat foods.

Food Safety Training Requirement
All food workers must have a valid Washington FWC and copies must be available upon request.
New employees without valid FWCs must be given food safety training before beginning food handling duties. The training must be documented and kept onsite. Food workers must have a FWC within 14 calendar days of hire.
Initial FWCs are valid for 2 years and renewal cards are valid for 3 years. The FWC must be renewed within 60 days before the card expires.

Restrictions/Exclusion of Ill Food Workers
Healthy food workers are important factors in foodborne illness prevention. Food workers must inform the PIC if they have:
• Symptoms including diarrhea, vomiting, or jaundice. • A diagnosed illness from <i>Salmonella</i> Typhi, <i>Shigella</i>, Shiga toxin-producing <i>E. coli</i>, or hepatitis A. • A diagnosed illness from Norovirus or any <i>Salmonella</i>, if serving a highly susceptible population. • Infected, uncovered wounds. • Discharges from the eyes, nose, or mouth (persistent sneezing, coughing, or runny nose). • Sore throat with fever.
The PIC must restrict or exclude food workers with these conditions.

Notification
The PIC must notify the Regulatory Authority if a food worker has jaundice or a diagnosed illness that can be transmitted through food.

Potentially Hazardous Foods
Potentially Hazardous Foods require time and temperature control for safety.
PHFs include:
Animal Products
• Meat, fish, poultry, seafood, eggs • Dairy products
Cooked Starches
• Cooked rice, beans, pasta, potatoes
Fruits and Vegetables
• Cooked vegetables • Tofu • Sprouts (such as alfalfa or bean sprouts) • Cut melons • Cut leafy greens* • Cut tomatoes*
*New PHF in 2013

Imminent Health Hazards
A food establishment must immediately stop operations and notify the Regulatory Authority if an imminent health hazard may exist due to:
• Foodborne illness outbreak • Fire • Flood • Loss of electricity • Lack of hot water or loss of water service • Sewage backup • Misuse of toxic or poisonous materials • Any circumstance that may endanger public health
